Professional Summary

Detail-oriented Software Engineer with 4+ years of experience developing scalable web applications
Skilled in Java script (JS), Py, and modern frontend frameworks
Passionate about building efficient, user-friendly solutions and optimizing system performance.

Skills

- Java script (JS)
- Py
- Node js
- React js
- HTML / CSS
- Type script (TS)
- REST APIs
- Git & CI/CD

Work Experience

Software Engineer — TechWave Solutions (Jan 2022 – Present)

- Developed full-stack applications using JS, Node js, and React js.
- Built automated data tools using Py, reducing processing time by 35%.
- Implemented reusable UI components improving efficiency by 25%.
- Collaborated with teams to deliver features and increase stability.

Frontend Developer — BrightCode Labs (Jun 2020 – Dec 2021)

- Developed interactive UI features with Java script and React js.
- Optimized page load speed by 40% via performance tuning.
- Integrated REST APIs and improved debugging workflows.

Education

B.S. in Computer Science — University of California, Berkeley (2016 – 2020)

Projects

TaskFlow – Task Management App

- Built using React js, Node js, and Py for backend automation tasks.
- Implemented smart reminders using a Python scheduler.

CodeDoc – Documentation Generator

- CLI tool written in Py to auto-generate documentation from comments.

Certifications

- JavaScript Algorithms and Data Structures — freeCodeCamp
- Python for Everybody — Coursera
